

TTBC Learning Series: Workshop on Wastewater Reuse

Amari Dhaka (Karishma Hall- Level 14), May 31, 2017, 9:30 AM to 12:45 PM

Bangladesh PaCT, a program of International Finance Corporation (IFC) is organizing a half-day workshop on 'Wastewater Reuse'. The workshop aims to demonstrate the economic and environmental significance of reusing wastewater, and to highlight how reusing wastewater can ensure sectoral sustainability and facilitate an overall shift to a circular apparel industry.

Event Highlights

- ✓ Keynotes on industrial best practices in wastewater reuse
- ✓ Insights on cutting-edge technologies, and tailored solutions
- ✓ First-hand experience sharing by program partners
- ✓ **Panel discussion and More!**

Textile Life Cycle

Wastewater treatment and disposal is expensive!

Using water wisely during production, and reusing the treated wastewater where possible, can result in great gains for textile factories.

- Reduced resource consumption
- Reduced processing cost
- Reduced wastewater treatment cost
- Reduced pollution load
