LIVES

2020, May

What is COVID-19 Supply Chain System?

What are the supply requirements?

How can the local suppliers be involved in the supply chain system?

COVID-19 Supply Chain System (CSCS)

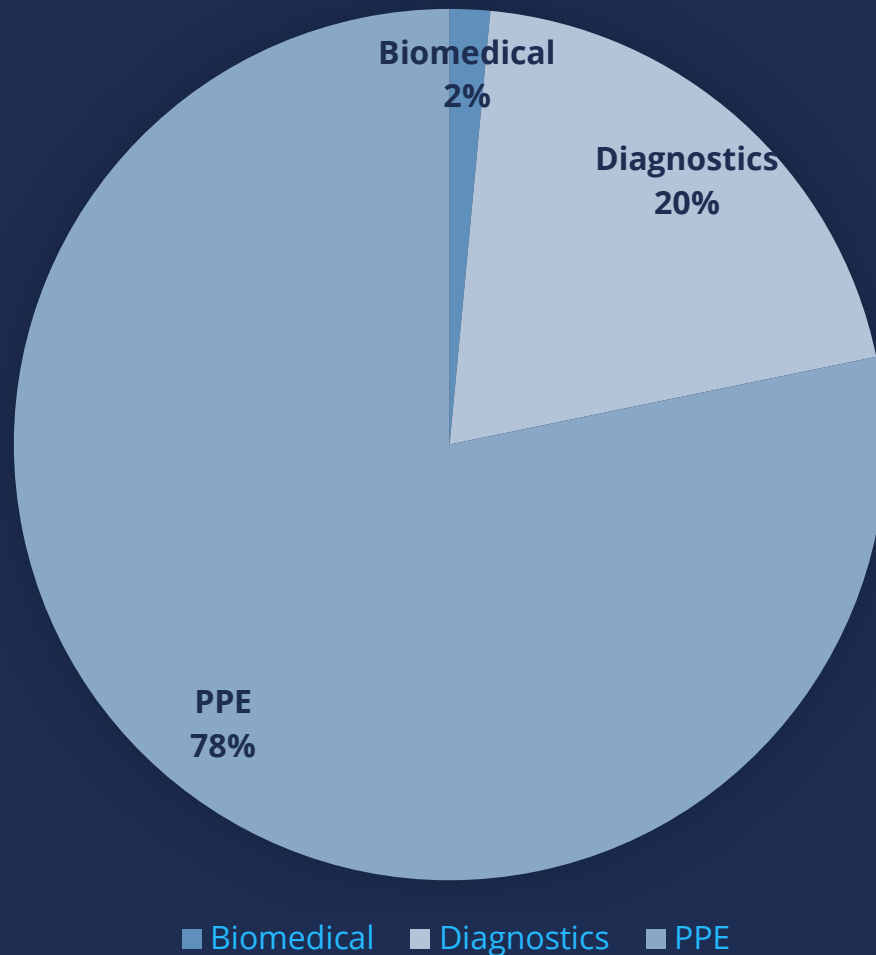

- Supply Chain Task Force co-chaired by WHO and WFP
- Convened to establish the CSCS
 - Task Force
 - Purchasing Consortia
 - Control Tower
 - Supply Portal – purpose-built to facilitate the requests for critical supplies and is able to receive requests for items in the catalogue
 - Every approved stakeholder who has an active role in the COVID-19 preparedness and response action plan can sign up and be a requestor (Government agencies, UN agencies, NGOs, and other partners)

Three-month supplies plan

Based on the country needs for COVID-19 preparedness and response, a 3-month supplies plan has been endorsed by the Government of Bangladesh and circulated to all agencies and partners.

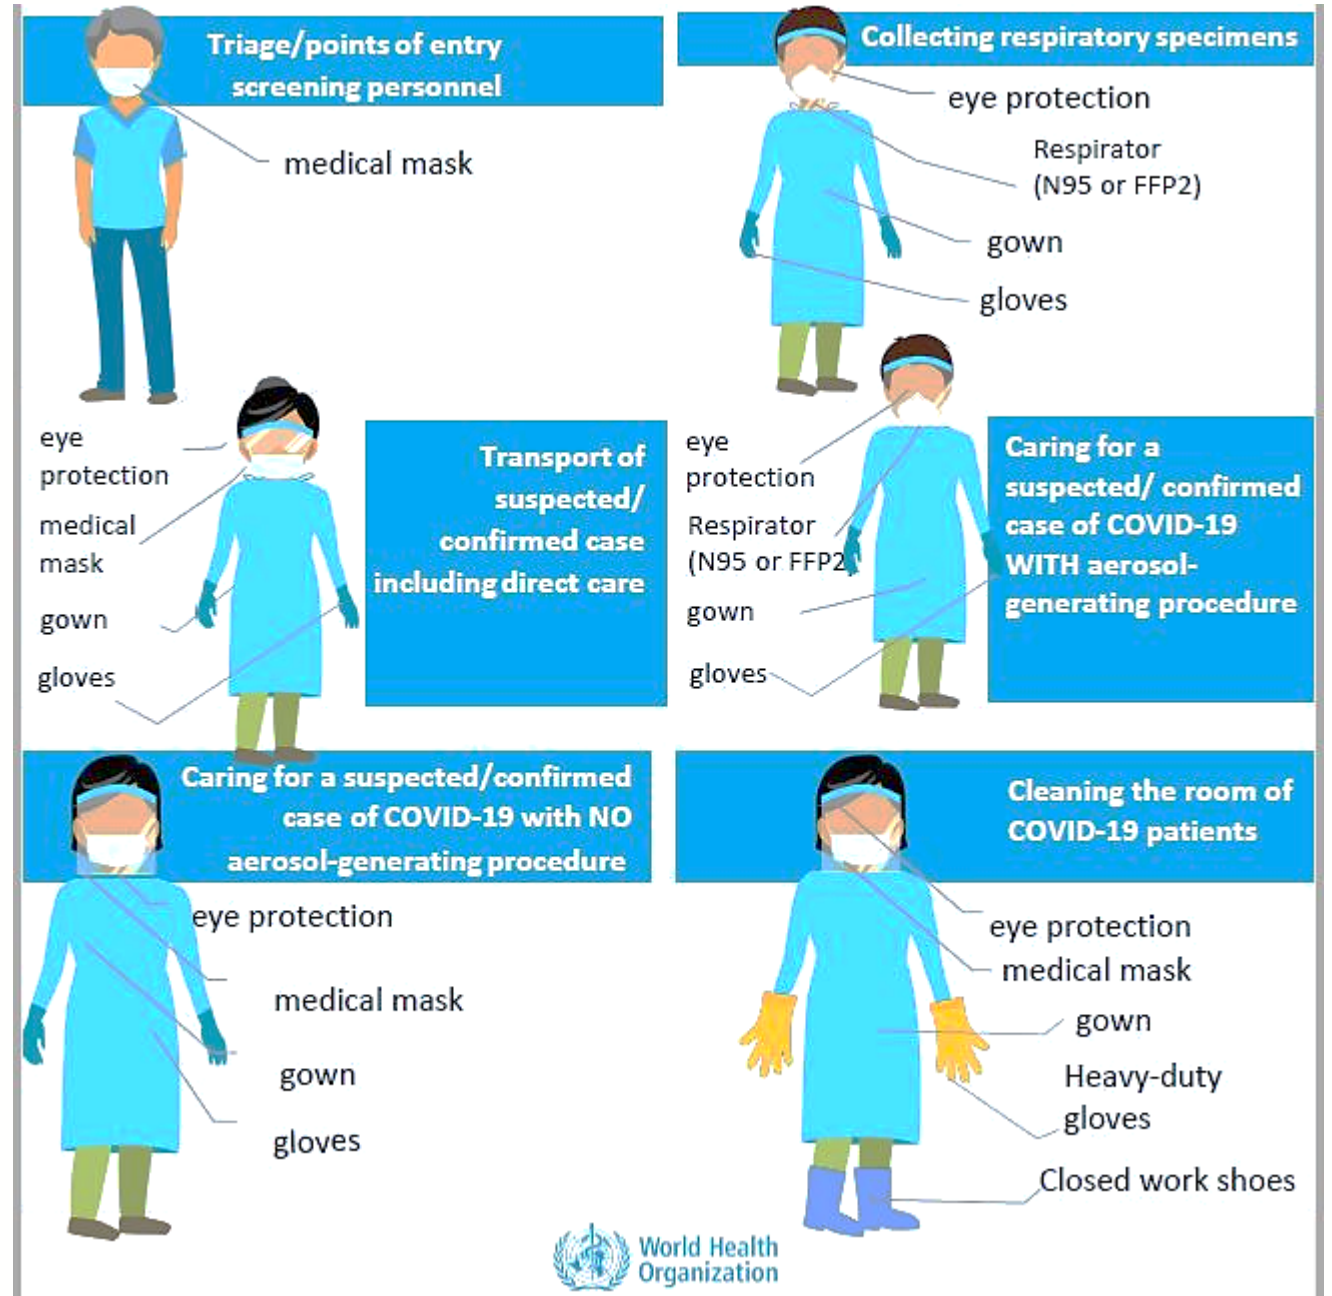

- Biomedical Equipment & Consumables (clinical management / medical equipment)
- Diagnostics (sample collection and test kits)
- Personal Protective Equipment (gown, apron, masks, eye protection, etc.)

3-month requirements

- Biomedical Equipment & Consumables (clinical management / medical equipment) = 925,976
- Diagnostics (sample collection and test kits) – 12,557,827
- **Personal Protective Equipment (gown, apron, masks, eye protection, etc.) – 48,449,575**

Personal Protective Equipment

Personal Protective Equipment

- Apron
- Gloves (surgical)
- Gloves (examination)
- Face shield
- Respirator mask (N95 / FFP2)
- Medical / Surgical mask
- Gown
- Goggles
- Bio Hazard Bag

Personal Protective Equipment

Items NOT in the catalogue:

- Hand sanitizer
- **Coverall**
- **Heavy-duty gloves**
- Hexi sol / Alcohol based hand-rub
- Liquid Soap
- **Body bag (adult / child)**
- **Surgical cap**
- Closed colored bin
- Sodium hypo chloride / hypochlorite
- Disinfectant sprayer
- **PCR gloves (powder free)**
- Medical gas system

How can a local supplier be involved in the local supply chain?

- Local suppliers can do business with any of the buying agencies to supply PPEs (catalogue/non-catalogue)

How do you get certified?

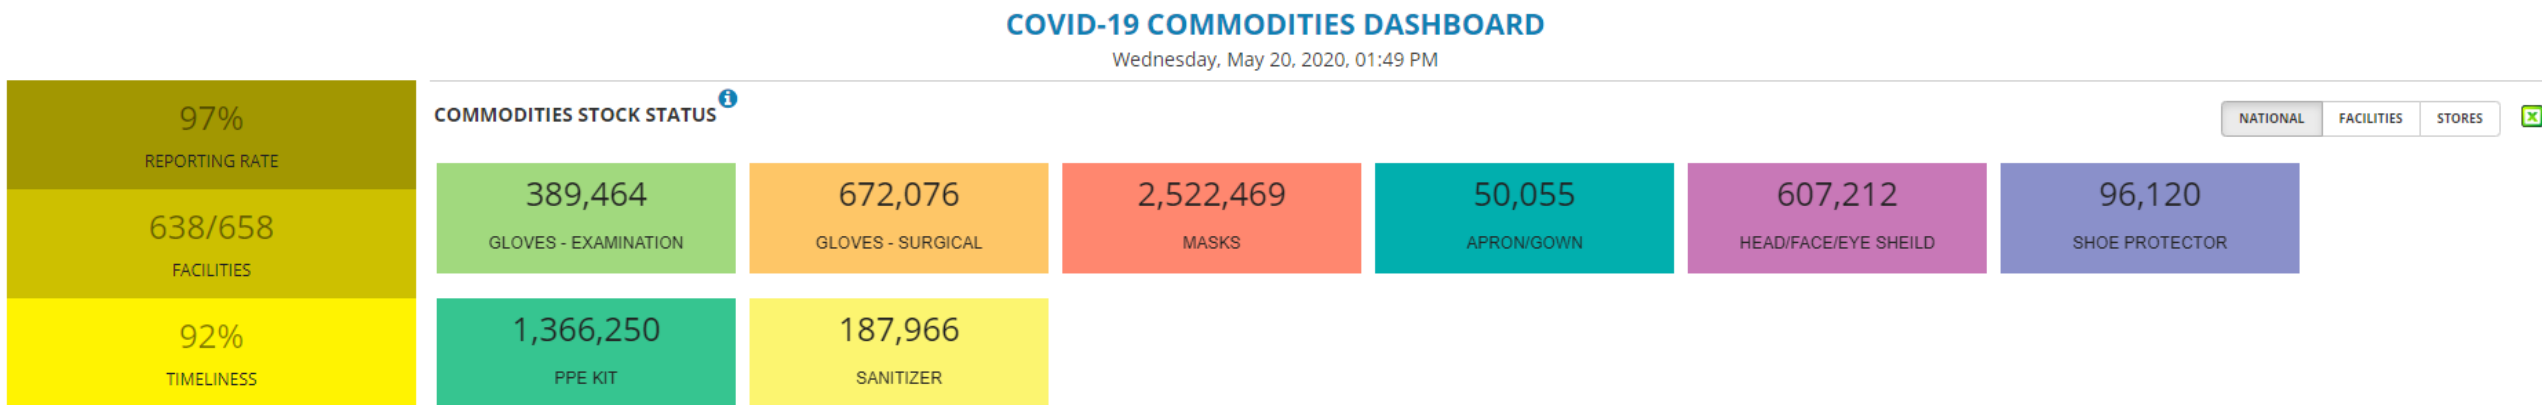

- Five (5) enlisted laboratories in the country for certification
- Minimum testing parameters in place

How can a local supplier be involved in the local supply chain?

Any interested supplier can reach-out through WFP, being the UN Coordinator for Logistics and Procurement Pillar. Your information will be disseminated to all member agencies (vice-versa).

AOB: Inventory Management

- An online dashboard is being managed by the government and partners for the inventory of supplies in the country
 - Monitor real-time movements of PPEs in over 600 health facilities
